Muhammad Islam Kamran

Full-Stack Software Engineer – Python, FastAPI & Angular

FastAPI · Angular / TypeScript · REST & WebSockets · AI Integrations (OpenAI, GPT) · MySQL · AWS

Dubai, UAE | +971-556643426 | m.islamkamran@gmail.com | linkedin.com/in/muhammadislamkamran | github.com/islamkamran | islamkamran.github.io

Technical Skills

Backend: Python (FastAPI, Django, Flask), RESTful APIs, WebSockets, SQLAlchemy, Alembic, JWT / OAuth2, Role-Based Access, Caching, Rate Limiting, Cron Jobs
Frontend: Angular, TypeScript, JavaScript, React, PHP, HTML, CSS, API Integration
AI & Automation: OpenAI Whisper, GPT-based applications, LLM APIs, RAG with Pinecone, OCR & Document Bots, Selenium, AI-Assisted Development
Databases: MySQL, SQLite, MongoDB
Cloud & Tools: AWS (EC2, RDS, Elastic Beanstalk, Load Balancing), PM2, InMotion Hosting, Vercel, Render, GitHub Actions, Git, New Relic, Postman
Currently Learning: Docker, Apache Kafka, PostgreSQL, PyTest

Professional Experience

Indus Real Estate LLC – Apparel Group **March 2025 – Present**
Team Lead – IT & Innovation *Dubai, UAE (On-site)*

- Lead a team of **4 engineers** building the company's web platforms end to end: database, APIs, frontend and deployment.
- Built **4 portals** (properties, agents, technical services "Indus Specialty" and the General Manager's portal) with **FastAPI** backends, **Angular / TypeScript** frontends and **MySQL**.
- Built real-time notifications and live listing sync from **Property Finder** using **WebSockets**, wired into the portal UIs.
- Shipped **15+ public landing pages and websites** with Angular, React and PHP; secured APIs with **JWT**, caching and rate limiting.
- Deploy and run the full stack on **AWS** (EC2, RDS, load balancing, PM2) and InMotion Hosting.

Business Innovation & Tech Solutions (BITS) **May 2024 – Aug 2026**
Lead Backend Engineer & Technical Consultant (part-time from Mar 2025) *Hybrid – Dubai / Pakistan*

- Built **Big Star** and **Zeeshan Motors** (Baig Group, Dubai) end to end: **FastAPI** backends with MySQL / SQLite and JavaScript, HTML and CSS frontends.
- Integrated **Google Maps**, Places and container APIs into the frontend; built **Selenium** scraping and automation.
- Led backend, frontend and DevOps; deployed on **AWS** EC2 / RDS with load balancing and PM2, monitored with **New Relic**.

K2X Technologies **May 2023 – April 2024**
Software Engineer / Product Owner *Pakistan (On-site) – clients via SquareX, Denmark*

- **Neptune (GPT-based AI product):** built the **Flask** backend and Google sign-in; maintained on AWS with the cloud team; delivered to client Drip.
- **Rollout:** built the **FastAPI** backend (SQLAlchemy, Alembic, MySQL, JWT / OAuth2, role-based access) and JavaScript / HTML / CSS frontend.
- Product owner for the **ECOWAS** energy project (UN SDGs), managing a team of 5; backend and on-site engineering for **DGIPR** (Govt. of KP).

CareCloud (MTBC) **October 2022 – April 2023**
Software Engineer *Pakistan*

- **AI speech:** built **Django** APIs for the speaking component of Rosetta, an English-learning app, using **OpenAI Whisper**.
- Built **Flask** document bots for FOX Caregiver (US healthcare) that extract and score medical data into **MongoDB**.
- Worked with QA and frontend teams on a Flask **OCR** app reading 47 commonly used US insurance cards.

AI Projects & Research

LLM & RAG Applications | *Python, LLM APIs, Pinecone* **Personal**

- Built LLM and retrieval-augmented generation (RAG) apps with vector search (Pinecone) through an applied LLM course; shared on LinkedIn.

Quantum Walk Image Encryption | *MATLAB, Python, Cryptography* **2021 – 2022**

- First-author, peer-reviewed paper in **CMC (Impact Factor 3.7)** from my MPhil research fellowship: image encryption with quantum walks and chaotic maps. Paper

Education

Quaid-i-Azam University (QAU) **2020 – 2022**
MPhil in Computer Science – CGPA 3.70 / 4.00 *Islamabad, Pakistan*

University of Engineering & Technology (UET) **2016 – 2020**
Bachelor of Science (BS) in Computer Systems Engineering *Peshawar, Pakistan*
