# Muhammad Islam Kamran

**Senior Software Engineer · Full Stack (Python / Angular)**

Python (FastAPI, Django) · TypeScript / Angular · PostgreSQL · Cloud (AWS) · REST & WebSockets

Dubai, UAE | +971-556643426 | m.islamkamran@gmail.com | linkedin.com/in/muhammadislamkamran | github.com/islamkamran

## Technical Skills

**Backend Engineering:** Python (FastAPI, Django, Flask, AsyncIO), RESTful APIs, Microservices, gRPC, Celery, SQLAlchemy, Alembic, Clean Architecture, PEP 8
**Frontend Development:** Angular (v12–v17+), TypeScript, RxJS, NgRx State Management, JavaScript (ES6+), HTML5/SCSS, Responsive UI, Mobile App (Flutter)
**Databases & Caching:** PostgreSQL, MySQL, Redis (Caching, Session Stores, Rate Limiting), MongoDB, Database Schema Design & Query Optimization
**DevOps & Architecture:** Docker Containerization, AWS (EC2, S3, RDS), Linux/Nginx, CI/CD (GitHub Actions), Git, PyTest, Automated Unit/Integration Testing

## Professional Experience

**Indus Real Estate LLC – Apparel Group** **March 2025 – Present**
*Team Lead – Software Engineering* *Dubai, UAE*

- Lead full-stack engineering across enterprise web portals using **Python (FastAPI)** and **Angular/TypeScript**, reducing end-to-end page render latency by **85%**.
- Spearhead the delivery of 15+ high-conversion landing pages and 4 self-service enterprise client portals, connecting high-throughput backend APIs with modular Angular components.
- Implemented real-time property inventory updates and instant communication pipelines using **WebSockets** and **Redis pub/sub**, eliminating data delays for 10,000+ daily active users.
- Direct code reviews and automated testing standards across a 4-person squad, enforcing component reusability, strict typing with **RxJS/TypeScript**, and comprehensive **PyTest** integration coverage.

**Business Innovation & Tech Solutions (BITS)** **May 2024 – Present**
*Full Stack Engineer & Technical Lead* *Hybrid – Dubai / Pakistan*

- Architected responsive web applications using **FastAPI** microservices and **Angular**, delivering end-to-end automotive e-commerce and inventory management dashboards.
- Engineered reactive client-side state management using **RxJS observables**, ensuring seamless data synchronization across complex vehicle listing tables and search filters.
- Designed high-performance REST APIs and background task workers (AsyncIO/Celery), integrating payment gateways and third-party logistics tracking webhooks.
- Configured containerized deployments via **Docker** and **AWS**, streamlining staging and production releases with zero downtime using GitHub Actions CI/CD.

**CareCloud** **October 2022 – April 2023**
*Software Engineer (Full Stack / Python)* *United States (Remote)*

- Engineered full-stack features for Rosetta Stone Language Lab using **Django** and dynamic frontend interfaces, integrating **OpenAI Whisper** models for automated audio evaluation.
- Developed interactive healthcare provider dashboards and intelligent document OCR tools in **Flask** and TypeScript, parsing medical insurance cards across 47+ formats.
- Collaborated with UI/UX designers and QA teams to ship responsive patient management views for the FOX Caregiver platform across 21 US states.

## Key Projects & Technical Implementations

**Enterprise Multi-Portal Ecosystem** | *Angular, TypeScript, RxJS, FastAPI, PostgreSQL, AWS* **2025**

- Engineered unified client and broker management portals handling multi-tenant authorization, real-time listing feeds, and automated PDF statement generation.

**Automotive E-Commerce & Auction Engine** | *Python, Angular, Redis, Docker, MySQL* **2024**

- Built an end-to-end commercial vehicle trading platform featuring real-time bidding feeds, sliding-window rate limiters, and sub-100ms catalog search.

## Education

**Quaid-i-Azam University (QAU)** **2020 – 2022**
*Master of Science (MS) in Computer Science* *Islamabad, Pakistan*

**University of Engineering & Technology (UET)** **2016 – 2020**
*Bachelor of Science (BS) in Computer Systems Engineering* *Peshawar, Pakistan*
